DETAILED ACTION

1. This action is responsive to amendment filed 12/09/05.
2. Claims 13-24, 29, 31-39, 44, 46-49, 55, 57-63 are pending in the application.

Allowable Subject Matter

2. Claims 13-24, 29, 31-39, 44, 46-49, 55, 57-63 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 13, 44, the prior art does not teach forming a 3D surface indicative of 3D information contained in two images, forming a variable which indicates a likelihood of error in the 3D surface; wherein forming a plurality of seed voxels which have a probability of being correct greater than a specified amount which makes it unlikely that the voxels will not be correct, and tracing a surface from the plurality of seed voxels.

Claims 14, 39, the prior art does not teach the tracing is carried out for a plurality of the voxels in a multiresolution fashion, such that certain voxels are computed at a coarsest level, and other voxels are computed at a more detailed level.

Claim 29, the prior art does not teach identifying at least one voxel, with a relatively high probability of being a correct 3D measure, forming at least a part of the surface map by propagating from the seed voxel.

Claim 46, the prior art does not teach forming a 3D surface indicative of 3D information contained in two images, forming a variable which indicates a likelihood of error in the 3D surface; and tracing a surface from the plurality of seed voxels which have a low likelihood of error.

Claim 55, the prior art does not teach forming a surface in a volume as a disparity surface; wherein the surface is continuous in the space (x,y,d) where x and y are the coordinate of the pixel, and d is the amount of disparity of the pixel.

Claim 60, the prior art does not teach forming a disparity map of 3D information for specified coordinates of matching pixels by forming a plurality of areas, finding first information in each of said plurality of areas which have relatively high being correct matches and obtaining said first forming a disparity map of probability of information at a first resolution, and propagating along a surface to obtain second information at a second resolution less than said first resolution.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
